

FOR IMMEDIATE RELEASE

Sun Pharma Announces USFDA Approval of YONSA[®] (abiraterone acetate) To Treat Metastatic Castration-Resistant Prostate Cancer In Combination With Methylprednisolone

YONSA[®] was shown in clinical studies to be an effective form of abiraterone acetate, and can be taken with or without food, in combination with methylprednisolone

Sun Pharma had acquired YONSA[®] from Churchill Pharmaceuticals and will commercialize YONSA[®] in the U.S.

Mumbai India, Princeton NJ, and King of Prussia, May 23, 2018 – Sun Pharmaceutical Industries Ltd. (Reuters: SUN.BO, Bloomberg: SUNP IN, NSE: SUNPHARMA, BSE: 524715, “Sun Pharma” and includes its subsidiaries and/or associate companies) and Churchill Pharmaceuticals, LLC. (Churchill) today announced that one of Sun Pharma’s wholly owned subsidiary companies has received approval from the U.S. Food and Drug Administration (FDA) for YONSA[®] (abiraterone acetate), a novel formulation in combination with methylprednisolone, for the treatment of patients with metastatic castration-resistant prostate cancer (mCRPC).

Churchill is eligible to receive upfront and sales-linked milestone payments, and royalties on sales from Sun Pharma pursuant to an agreement between the two companies to commercialize YONSA[®] in the U.S.

“We are pleased to add YONSA[®] to our growing oncology portfolio and continue to deliver on Sun Pharma’s commitment for enhanced patient access to innovative cancer therapies,” said Abhay Gandhi, CEO - North America, Sun Pharma.

YONSA[®] in combination with methylprednisolone was filed as a New Drug Application (NDA) under the 505(b)(2) regulatory pathway and will be promoted as a branded product in the U.S.

About YONSA[®] (abiraterone acetate) tablets

YONSA[®] is a CYP17 inhibitor which uses proprietary SoluMatrix Fine Particle Technology™ to create a micronized (smaller particle size) formulation of abiraterone acetate tablets - for the treatment of metastatic castration-resistant prostate cancer, in combination with methylprednisolone. The active ingredient is converted *in vivo* to abiraterone, an androgen biosynthesis inhibitor that inhibits 17 α -hydroxylase/C17,20-lyase (CYP17). The CYP17 enzyme is expressed in testicular, adrenal and prostatic tumor tissues and is required for androgen biosynthesis.

About Sun Oncology

Sun Oncology is the branded oncology division of a wholly owned subsidiary of Sun Pharma with focus on enhancing patient access to innovative cancer therapies. Sun Oncology is comprised of branded cancer products like Odomzo® (sonidegib) and YONSA® (abiraterone acetate).

About Churchill Pharmaceuticals, LLC

Churchill is focused on providing value to cancer care by developing quality orally delivered oncology products with optimized clinical profiles. Our commitment to responsibly deliver these products to the patients, payers and healthcare communities we serve is at the core of our business. Churchill has a license from iCeutica to the SoluMatrix Fine Particle Technology™, a proprietary manufacturing process that may unlock the potential of certain oral drugs by changing how well they dissolve and how efficiently they are absorbed.
